

UPTURNED T
SERIES

SO MODISH SO HIGH-TECH.

Peecker Sound was the first pro sound manufacturer able to create a 1600 W RMS active stack system (self-powered sub driving two sound columns) with birch multi-plywood cabinets, so "à la mode" in the professional audio market these days.

Moreover, all **Upturned T** series models are available in white at no extra cost: a captivating design, in line with these systems' cutting edge technology.
